Alien Encounters, the Theology of the Urantia Book & the Origin of Human Consciousness

Raul Valverde*

Concordia University, Canada

Abstract

Recently, several people in Latin America have revealed their encounters with alien races. Many times, these encounters have the purpose of revealing information related to spiritual science, consciousness and cosmology. The Urantia book is a spiritual and philosophical revelation from the spiritual world that aims to unite religion, science and philosophy. This article aims at presenting the similarities between the teachings given to people by beings from alien races in Latin America and the Urantia book. The presentation also aims at expanding the Urantia book based on the revelations of aliens to human beings and presenting the explanation for the origin of human consciousness. This article would be an eye opener for those interested in cosmology, origin of human consciousness and human life models.

Keywords: Quantum consciousness, quantum physics, Scientific GOD, alien encounters, Urantia book.

1. Introduction

For many years, people have reported alien encounters in Latin America, in particular in Mexico and Peru. Many of these encounters, according to the contactees, are meant to teach us about the origin of human life, evolution and cosmic plans. These models proposed by these encounters seem to be consistent with the human Quantum Consciousness model proposed recently by many scholars (Valverde 2016, Hameroff 1994, Penrose, R., & Hameroff, S. 2011). The Urantia book aims to unite religion, science and philosophy and also supports the idea of a unified quantum field as it explains the nature of reality by using quantum principles (Valverde 2018).

This article aims at presenting the similarities between the teachings given to people by beings from alien races in Latin America and the Urantia book and also aims at expanding the Urantia book based on the revelations of aliens to human beings and presenting the explanation for the origin of human consciousness.

This is an effort to contribute to spiritual science that is a paradigm that helps to reconcile science and religion. Spiritual science uses concepts from different fields including metaphysics,

* Correspondence: Raul Valverde, Concordia University, Canada. E-mail: raul.valverde@concordia.ca

quantum physics, and parapsychology (Steiner 1999) into a unified system that describes the multi-dimensional nature of man and the universe (Valverde 2018 b). The humankind is always evolving and what was called before religion becomes science in modern times (Valverde 2019 b). This article would be an eye opener for those interested in cosmology, origin of human consciousness and human life models.

2. Urantia book

The Urantia Book (1996) is a spiritual and philosophical book that originated in Chicago sometime between 1924 and 1955. The authors introduce the word "Urantia" as the name of the planet Earth and state that their intent is to "present enlarged concepts and advanced truth". The book aims to unite religion, science and philosophy, and its enormous amount of material about science is unique among literature. Among other topics, the book discusses the origin and meaning of life, humankind's place in the universe, the relationship between GOD and people, and the life of Jesus.

The Urantia Foundation, a U.S.-based non-profit group, first published The Urantia Book in 1955. The book and its publishers do not name a human author. Instead, it is written as if directly presented by numerous celestial beings appointed to the task of providing an "epochal" religious revelation. As early as 1911, William S. Sadler and his wife Lena Sadler, physicians in Chicago and well known in the community, are said to have been approached by a neighbor who was concerned because she would occasionally find her husband in a deep sleep and breathing abnormally (Mullins & Sprunger 2000).

The Sadlers came to observe the episodes, and over time, the individual produced verbal communications that claimed to be from "student visitor" spiritual beings. This changed sometime in early 1925 with a "voluminous handwritten document," which from then on became the regular method of purported communication. The individual was never identified publicly but has been described as "a hard-boiled businessman, member of the board of trade and stock exchange" (Mullins & Sprunger 2000).

The Sadlers were both respected physicians, and William Sadler was a debunker of paranormal claims, who is portrayed as not believing in the supernatural. In 1929, he published a book called *The Mind at Mischief*, in which he explained the fraudulent methods of mediums and how self-deception leads to psychic claims (Mullins & Sprunger 2000).

In 1923, a group of Sadler's friends, former patients, and colleagues began meeting for Sunday philosophical and religious discussions but became interested in the strange communications when Sadler mentioned the case at their fourth meeting and read samples at their request. Shortly afterwards, a communication reportedly was received about which this group would be allowed to devise questions and that answers would be given by celestial beings through the "contact personality". Sadler presented this development to the group, and they generated hundreds of questions without full seriousness, but their claim is that it resulted in the appearance of answers

in the form of fully written papers. The Sadlers and others involved, now all deceased, claimed that the papers of the book were physically materialized from 1925 until 1935 in a way that was not understood even by them, with the first two parts being completed in 1934 and the third and fourth in 1935. The last Forum gathering was in 1942 (Mullins & Sprunger 2000).

After the last of Part IV was obtained in 1935, an additional period of time supposedly took place where requests for clarifications resulted in revisions. Sadler and his son William (Bill) Sadler, Jr. at one point wrote a draft introduction and were told that they could not add their introduction. The Foreword was then "received". The communications purportedly continued for another two decades while members of the Forum studied the book in depth, and according to Sadler and others, permission to publish it was given to them in 1955 (Mullins & Sprunger 2000).

The Urantia Book is claimed to be, a presentation of truth to us, about the creator and about creation. It greatly expands our view and understanding of the creator and the cosmos, and with this bigger picture, science, religion, and history, and other areas of human knowledge become integrated. We are not alone in the universe, quite the contrary. The Urantia Book was written by love - respecting, civilized inhabitants of the universe. It was written by a revelatory committee, through a process involving a contact human, for the betterment of our planet. The identity of the contact human is not known, and not considered important. Urantia is the name of our planet (Mullins & Sprunger 2000).

The Urantia Book revelation is not small; the edition quoted has 2,097 pages of fine print. For most of us, it is not a quick study or easy reading. The Urantia Book is valuable, for it reveals a much larger perspective than was previously known on Earth regarding GOD, the universe's inhabitants, and the cosmos in which we live. The revelations from the Urantia Book are presented in four parts. Part 1, The Central and Super universes, is about GOD, GOD's relationship to creation, GOD's relationship to individuals, and the structure and inhabitants of the greater cosmos. Part 2, The Local Universe, is about our part of the cosmos. It presents topics including creation, evolution, administration, and the various inhabitants of our local universe. Part 3, The History of Urantia, includes information about the origin of our planet, and about its physical, biological, and social evolution. Part 4, The Life and Teachings of Jesus, is self-explanatory (Mullins & Sprunger 2000).

The Urantia Book is approximately 2,000 pages long, and consists of a body of 196 "papers" divided in four parts, and an introductory forward:

- Part I, titled "The Central and Super universes", addresses what the authors consider the highest levels of creation, including the eternal and infinite "Universal Father", his Trinity associates, and the "Isle of Paradise".
- Part II, "The Local Universe", describes the origin, administration, and personalities of the local universe of "Nebadon", the part of the cosmos where Earth resides. It presents narratives on the inhabitants of local universes and their work as it is coordinated with a scheme of spiritual ascension and progression of different orders of beings, including humans, angels, and others.

- Part III, "The History of Urantia", compiles a broad history of the Earth, presenting a purported explanation of the origin, evolution, and destiny of the world and its inhabitants. Topics include Adam and Eve, Melchizedek, essays on the concept of the Thought Adjuster, "Religion in Human Experience", and "Personality Survival".
- Part IV, "The Life and Teachings of Jesus", is the largest part at 775 pages, and is often noted as the most accessible and most impressive, narrating a detailed biography of Jesus that includes his childhood, teenage years, family life, and public ministry, as well as the events that led to his crucifixion, death, and resurrection. Its papers continue about appearances after he rose, Pentecost and, finally, "The Faith of Jesus".

3. Pablo Hawser, Alien Encounter and Origin of Human Consciousness

Hawnsner encountered a UFO on the road from the City of Querétaro to Mexico City after a day's work. The unexpected event occurred in the afternoon light, before dusk, but there was enough light to see an object landing in a small clearing behind a group of trees. Curiosity led him to follow the object and park. He then saw a ship with the appearance of a metallic flying saucer had landed on the ground, and that a pair of "human" beings seem to be the pilots of the ship. Later he received a phone call in his office that began a period of contact with these beings that lasted for many months. These beings gave him a set of data about the origin of the Universe and a model of human life. He also recounts how he has been transferred on several occasions inside the ship to other parts of the Earth, in seconds (Hawnsner 2009). In this case, the Non Human Intelligent (NHI) beings are human looking. Hawnsner claimed that the contacts started with the telepathic communications when he initially approached the Unidentified Aerial Phenomena (UAP) but then modality change to physical when the NHIs contacted him in face to face meetings.

Hawnsner also made trips to another planet called Milburbek, where he had the experience of living together with these beings. He wrote a book, *The Response* (Hawnsner 2009), in which he describes many of the teachings that were given to him in his role as a receiver of universal information with the task of disseminating this knowledge among as many people as possible: information about the size of the Universe, the origin of the same in the Big Bang, and the knowledge that there was - and there are continuously - many more "Big Bangs".

In Hawnsner (2009), he proposed a cosmic model that consists of a central Universe (figure 1) (that Hawnsner calls the Island of Light) and seven surrounding Super-Universes, we are in the Seventh. Each Super-Universe constitutes a gigantic area of creation and contains 100 000 zones called local universes (figure 2).

On Planet Earth, man has the privilege of being a vehicle for the evolution of spirits in a physical, spatio-temporal domain. A planet is totally ready to be used when it has the ideal combination of mineral, vegetable and animal elements that allow for the development of technological humanity (Hawnsner 2009).

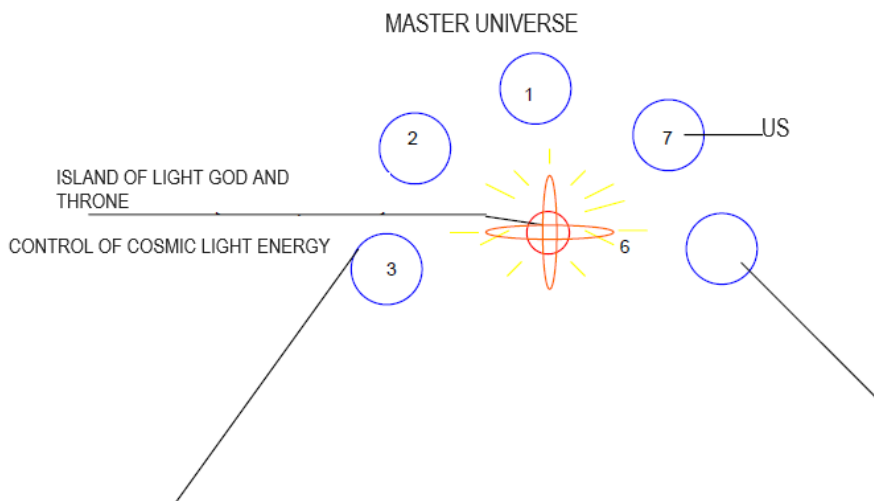

Figure 1. Central Universe

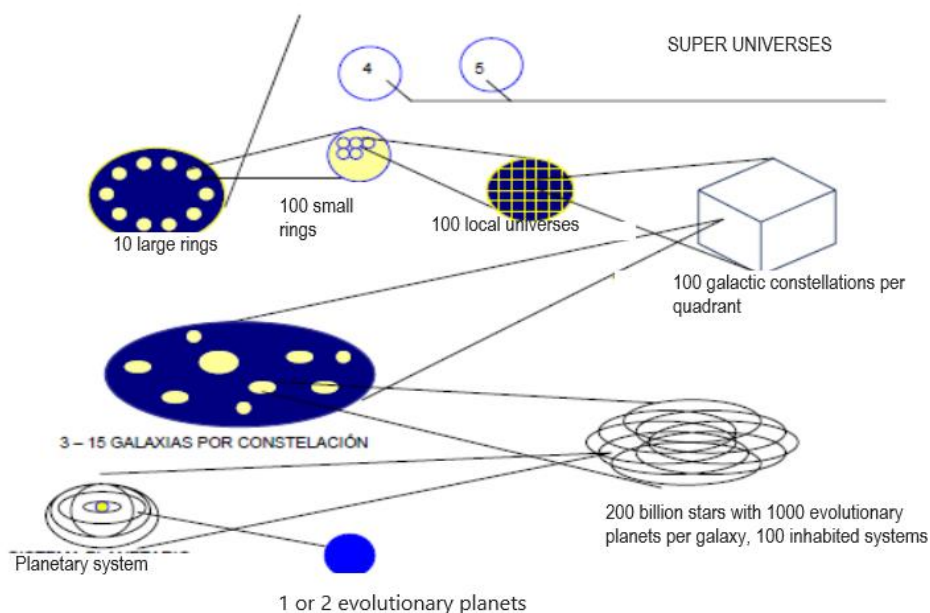

Figure 2. Super Universes

The origin of our existence is the citelium or quantum or cosmic cell (Hawnsner 2009). According to Hawnsner, our consciousness is of quantum origin that is also supported by the quantum consciousness model (Valverde 2018). This cosmic cell called quantum is a cosmic energy gene that has a spherical shape and an envelope membrane that allows the exit, through pores called perilios, of an energetic emission called cytobaric rays. In the interior of the citelium there are two elements reactive to each other that are the actimio and the animio. When the effect of

cosmic energy saturates the citelium, the animio liquefies and reacts with the actimio, generating a pulsation due to the attraction and rhythmic repulsion of its different polarities. The pulsing energy that results is the quon ray (Hawnsers 2009).

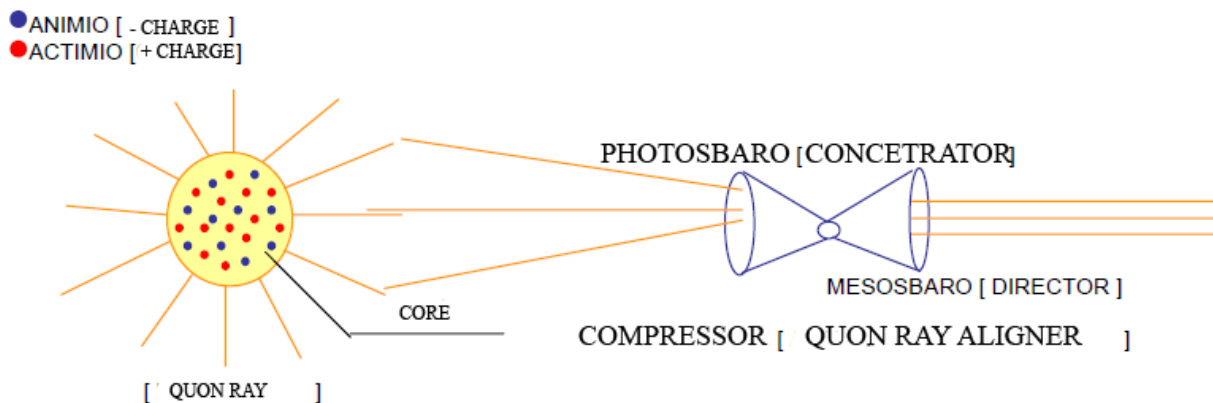

Figure 3. CITELIUM

QUON CYCLE

12 compressors in each ring = $12 * 3 = 36$ compressors photo cosmic

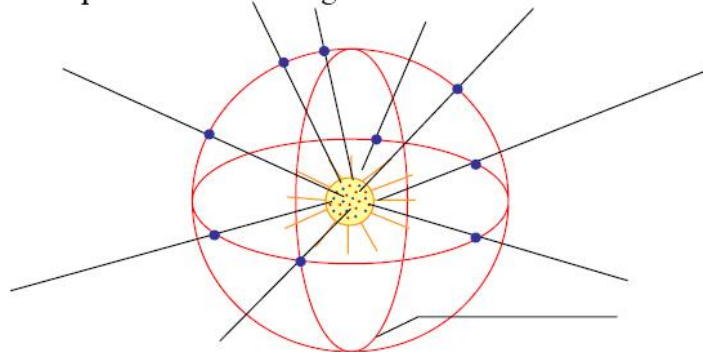

Figure 4. QUON CYCLE

The quon cycle was a sphere formed by three luminous rings perpendicular to each other, each of them contained 12 cosmic energy compressors with a quantum in the center. This is formed by the integration of two intersecting elements of conical shape, a mesobasoro and a photosbaro. The compressors captured the cytobaric rays from the cytoelium and expelled them to the outside of the quombio like vibratory filaments that denominated quon rays. These quon rays of electron energy are the most powerful energy in the cosmos. The quon ray, when extending in space, loses speed and condenses its filaments, eventually forming an energy sphere called quantar. When the quantar is saturated, the ray is subdivided into four more spheres, called quasars (Hawnsers 2009). This is consistent with Singer (1976), who mentions that the discovery of quasars by scientists can be a key for the explanation of the origin of consciousness.

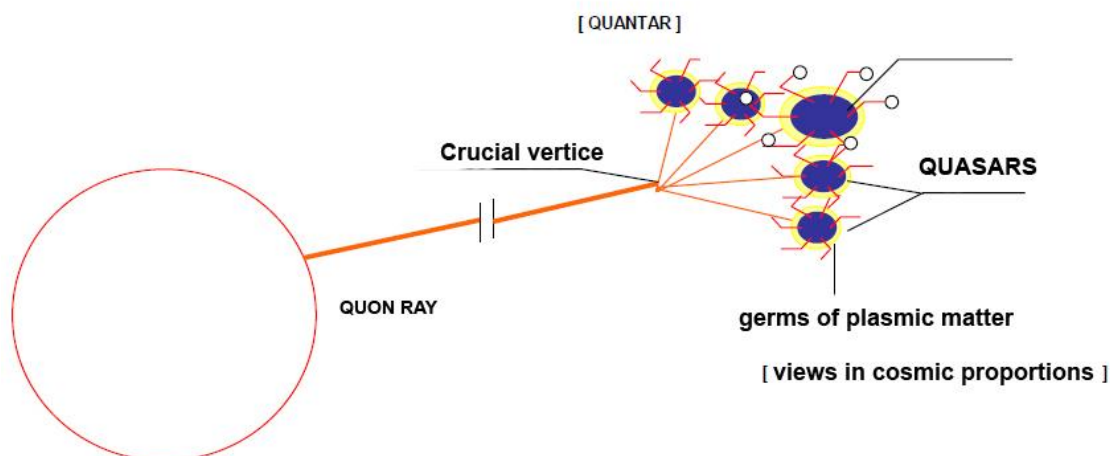

Figure 5. QUASARS and QUON Ray

When quantars and quasars are formed, plasma germs form groupings in the shape of spheres and integrate gravitationally. The transformation process is long and complex, planetary systems, like our single sun system with 12 planets, emerge from these combinations. Evolving energetically for millions of years, each cosmic cell will give rise to 36 quanta systems with their respective quasars and infinity of germs of plasma matter (Hawnsner 2009).

The spirit of each human being communicates with the physical being through his mind, through which consciousness acts. The physical brain is a computer which its data is stored. The mind is the result of energy that acts to animate its operation by synchronizing the mental spheres, which are the zones of energetic influence in different levels of consciousness. Energy manifests itself in different ways. When transforming, the same energy changes its vibration and depending on the characteristics of the vibration is the representation of that energy at the Consciousness level. The human being's perception of energy depends on the sense through which he can grasp the vibration of this energy at any given moment (Hawnsner 2009).

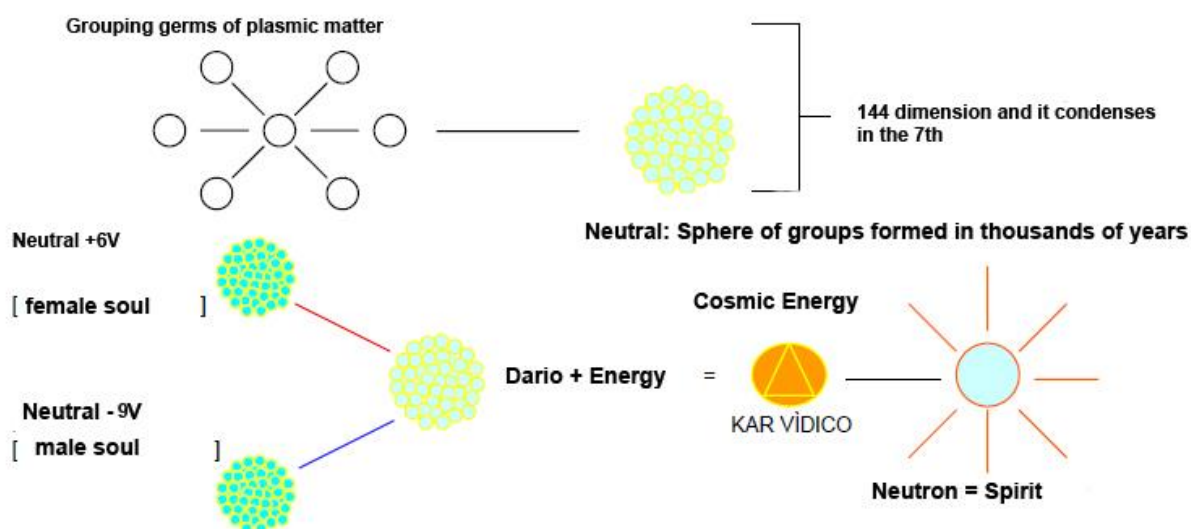

Figure 6. Quantum Spirit

Kar vidico is the integration and formation of the spirit that has neutral load. Formed by germs of plasmic matter which grow to form a harmonic vibrating charge of $[-9 + 6]$ Volts. That energy is concentrated and evolving for a long time and, when it is ready, it receives more energy and is used to form two denser bodies of different polarity. These bodies physically depart to other dimensions while remaining linked to the original spirit in the seventh dimension. These bodies descended to integrate fully at the level of the fifth dimension (Soul) (Hawsner 2009). This is consistent with the teaching of Jesus in the Gospel of Thomas, "If your leaders say to you, 'Look, the (Father's) kingdom is in the sky,' then the birds of the sky will precede you. If they say to you, 'It is in the sea,' then the fish will precede you. Rather, the (Father's) kingdom is within you and it is outside you. The Kar Vidico is the Cosmic Energy that is "the GOD within" (Valverde 2020)(Valverde 2019).

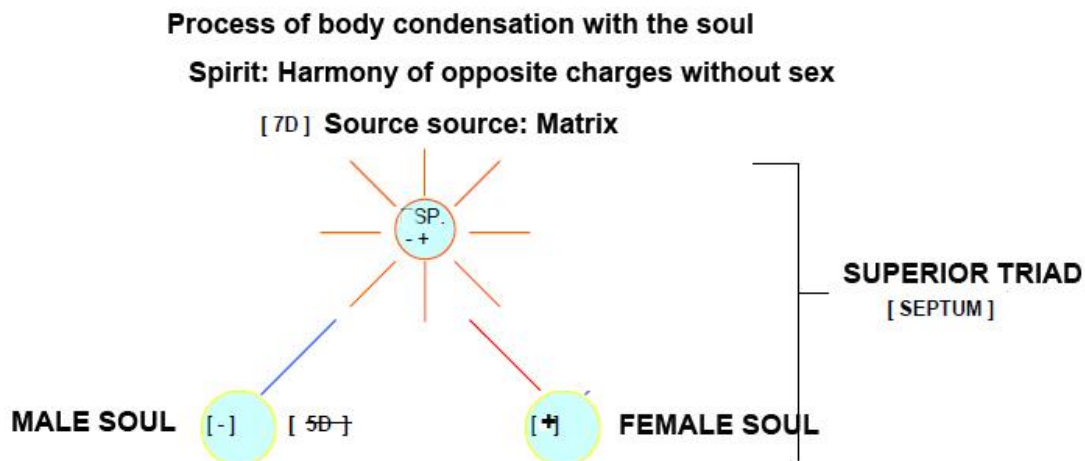

Figure 7 Spirit and Soul

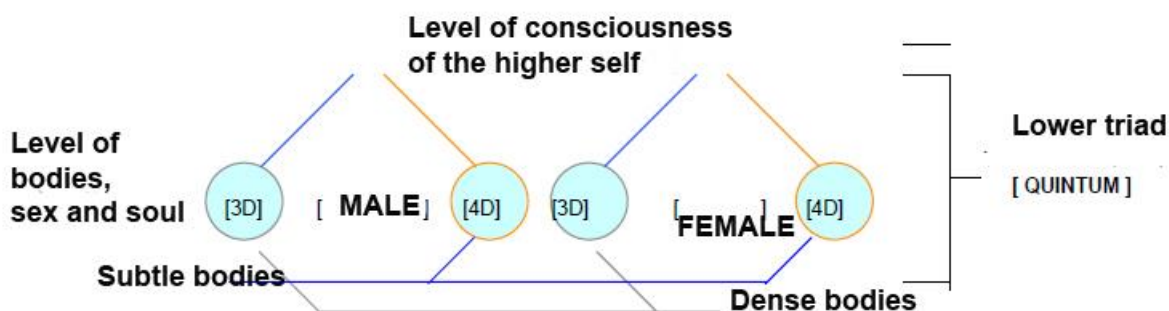

Figure 8. 3D and 4D

The soul incarnates into dense bodies in the 3D physical plane, these dense bodies are linked to a subtle or astral body that is less dense, and that ascends to the 4D after mortal death in the 3D plane.

4. Similarities between the teachings given of the response & the Urantia Book

This section aims at presenting the similarities between the teachings given by the Response and the Urantia book (Table 1)

Similarities exist in many aspects of the Urantia in book in particular in the concepts below:

- The concept of the Universe as a school for spiritual development
- The concept that what we call GOD is a source of energy that is used to create all the consciousness and matter of the Universe
- Similarities in the description of the Cosmology of the Universe where we live

(Nebadon)

- Quantum energy in vibration is the main source of matter
- The concept that Jesus or Michael is really the master of the local universe where we live (Nebadon)
- The idea that religions of authority need to evolve into religions of the spirit to encourage spiritual development and avoid division among humankind
- The duality of the human nature (Spiritual and Physical)
- Materialism is the source of egotism and spiritual development blindness
- The concept that GOD is not a person but everything that is part of the Universe.
- The revelation of the GOD within or divine spark that is the means of connection between the Universal father and us through prayer. This connection is key for humans to protect themselves from manipulation from human made institutions meant to control for self-fish reasons.
- The respect of the free will is the main driver of our human existence.

Table 1. Similarities between the teachings given of the Response and the Urantia book

Quote from the Urantia book that is supported by Response book	Quote from the Response Book
IN THE MINDS of the mortals of Urantia—that being the name of your world 1§1	On your planet Earth, which is actually known in the Universe as Dogue, Dubko or Urania. (Chapter 18 pp. 355)
GOD asks of us to learn, grow, and progress, to “Be you perfect, even as I am perfect...” 22§3	Look, the whole Universe is like a school for our spirit, from the first steps, from the envelope of the human being that is like his dress, he acquires experience and knowledge. The body is its vehicle of evolution and, when necessary, also of restitution to achieve balance and harmony. This is true justice. (Chapter 15 pp. 277)
<p>The Isle of Paradise is the dwelling place of the eternal GOD and the Paradise Trinity. Around and including the central Isle of Paradise is Havona, a perfect, eternal, divine, harmonious, and beautiful central universe.</p> <p>“The perfect and divine universe [Havona] occupies the center of all creation; it is the central core around which the vast creations of time and space revolve. Paradise is the gigantic nuclear Isle of absolute stability which rests motionless at the very heart of the magnificent eternal universe. ... [Havona] is of enormous dimensions and almost</p>	<p>In the first orbit, which is the closest, the spheres are known as the home of the Children of Havona. Havona is the cosmic name of the Island of Light. (Chapter 18, pp. 368)</p> <p>This master universe, as far as we know, is made up of the central universe or island of light, where the Father’s home is. (Chapter 11, pp 204)</p>

<p>unbelievable mass and consists of one billion spheres of unimagined beauty and superb grandeur...” 152§1</p>	
<p>A fragment of GOD, a spark of divinity, lives within each of us, guiding us GODward. “Every mortal who is consciously or unconsciously following the leading of his indwelling Adjuster is living in accordance with the will of GOD.” 1176§4</p>	<p>When I speak to you about the concept of GOD, you automatically turn to the Universe and think how many thousands or millions of light years away your divine presence will be, isn't it? You think materially because in reality you just have to make a small effort, communicate within yourself with your spirit, with your soul that encourages you, and you will be with Him, because your soul, which you are yourself, is part of your spirit and this is part of GOD. (Chapter 6 pp 85)</p>
<p>“The mesotron explains certain cohesive properties of the atomic nucleus, but it does not account for the cohesion of proton to proton nor for the adhesion of neutron to neutron. The paradoxical and powerful force of atomic cohesive integrity is a form of energy as yet undiscovered on Urantia.” 479§4</p>	<p>It has been almost 2,500 years since Democritus and Leucippus proposed the Atom theory, so that science of man will manage to have a family of sub atomic particles as are the fermions, leptons, quarks and mesotrons. And now, when some physicists believe that the physical domain of matter will soon be complete, we have to exist: electron and positron, positive energy and negative energy, matter and antimatter, mass and energy, Third and fourth dimensions. They all constitute the first rungs of a new scale for the knowledge of man. (Chapter 17 pp 309)</p>
<p>Consider that our local universe (which contains approximately ten million inhabited planets) is named Nebadon. Consider that its headquarters is a sphere named Salvington, and then consider the following:</p> <p>“At the head of all personality in Nebadon stands the Creator and Master Son, Michael, the universe father and sovereign....”406§1</p>	<p>The spirit that left you the guide is now at a very high level in creation, we know him by the name of Michael, he is the head of our local universe called Nebadon, and you know him as Jesus of Nazareth, which is as he was called during his incarnation on this planet. (Chapter 8, pp 113)</p> <p>Our local universe is called Nebadon and its boss is a Michael, this is not a name but a rank within the organization of the master universe, there are a total of 700 000 Michaels, one for each local universe of creation, and our Michael It is he</p>

	<p>who took an incarnation on your planet like Jesus the Nazareth. (Chapter 11, pp 205)</p>
<p>Our local system, Satania, has "...619 inhabited worlds...located in over five hundred different physical systems [solar systems]. Only five have more than two inhabited worlds, and of these only one has four peopled planets, while there are forty-six having two inhabited worlds." 359§7</p>	<p>In our galaxy there are 619 evolutionary planets, that is, inhabited by evolving humanities. The Earth is number 606 and its solar system is number 24. (Chapter 12 pp. 215)</p>
<p>While the religion of authority may impart a present feeling of settled security, you pay for such a transient satisfaction the price of the loss of your spiritual freedom and religious liberty. My Father does not require of you as the price of entering the kingdom of heaven that you should force yourself to subscribe to a belief in things which are spiritually repugnant, unholy, and untruthful. It is not required of you that your own sense of mercy, justice, and truth should be outraged by submission to an outworn system of religious forms and ceremonies. The religion of the spirit leaves you forever free to follow the truth wherever the leadings of the spirit may take you. And who can judge—perhaps this spirit may have something to impart to this generation which other generations have refused to hear?" 1731§3 [Jesus speaking, as quoted in The Urantia Book.]</p>	<p>The great mass, humanity is manipulated and subdued by ignorance, religions claim to show the way, but human participation, along with the fanaticism has distorted them. The alienated men always believe they are on the side that demands their justice and throw themselves into the struggles, they will sacrifice themselves and never know who benefited from their death. (Chapter 13 pp 265)</p> <p>All religions arise from the intuitive human need to find an explanation for their origin and destiny, not only physical, but spiritual. But these, having not achieved spirituality, have been transformed and materialized according to different cultures, and instead of having sought the common denominator and having overcome spiritually to evolve, men have turned them into fanatical motives of human discord. (Chapter 13 pp 365)</p>
<p>"The religions of authority can only divide men and set them in conscientious array against each other; the religion of the spirit will progressively draw men together and cause them to become understandingly sympathetic with one another." 1732§2</p>	<p>...men are divided, not only by material and political interests, but also by their religions, which instead of uniting them, separate them, as if they were not all spiritual children and of the same Father. Despite having all the same principles and the same origin, are confronted by ignorance and blind fanaticism that enslaves them mentally. (Chapter 12 pp 224)</p>
<p>"As prayer may be likened to recharging the</p>	<p>Is this explanation clear to you about the process</p>

<p>spiritual batteries of the soul, so worship may be compared to the act of tuning in the soul to catch the universe broadcasts of the infinite spirit of the Universal Father.” 1621§7</p>	<p>of the intercommunication mechanism between a human being and his spirit? It is important to understand this process because it is the path your prayers follow.</p> <p>When a person wishes to come into contact with GOD, he makes a prayer. Prayer is the thought directed to his own spirit and this thought is a mental process in which a dialogue is established within oneself and everything passes without cuts or censorship to his own spiritual brain. Communication is perfect, it doesn't even need words, they can be ideas, desires and emotions, and they will be fully received in the spiritual brain of being.</p> <p>From the contact thus established with the spirit through the third-dimensional physical brain, information that is identified as "intuition" is received and that comes from the fifth and even the seventh dimension. In addition, depending on the degree of evolution of the spirit, the continuing guidance of consciousness is reinforced by influences of the spirit through the aura, the plexus and the mental spheres. All this forms the behavior pattern of the person and in life can also be beneficially affected by the strength and nobility of their feelings (Chapter 20, pp 421)</p>
<p>“Matter—energy—for they are but diverse manifestations of the same cosmic reality, as a universe phenomenon is inherent in the Universal Father.” 467§4</p>	<p>So far you have seen the essential particle of matter being born, as you saw is an agglomerated condensation of cosmic energy (Chapter 11 pp.188)</p>
<p>“The spirit world is governed on the principle of respecting your freewill choice provided the course you may choose is not detrimental to you or injurious to your fellows.” 552§4</p>	<p>The evolutionary spirits received the gift of free will (Chapter 14, pp 260)</p>
<p>“In every mortal there exists a dual nature: the inheritance of animal tendencies and the high urge of spirit endowment. During the short life you live on Urantia, these two diverse and opposing urges</p>	<p>The New Age man is a conscious being of his spirit. By his mind, by his intelligence, by his knowledge and by his intuition, he understands the duality of his existence in physical body and</p>

<p>can seldom be fully reconciled; they can hardly be harmonized and unified; but throughout your lifetime the combined spirit ever ministers to assist you in subjecting the flesh more and more to the leading of the spirit.” 381§3</p>	<p>immortal spirit. (Chapter 20 pp 424)</p>
<p>At the time of a person’s first moral choice, currently at about age 5 years and 10 months on the average, the Heavenly Creator gives a fragment of himself to indwell that person’s mind, and this is currently true for every normal-minded human on the planet. This indwelling fragment of GOD, called the “Thought Adjuster” or “Mystery Monitor,” continually works with you to lead you GODward. You might say that from about age 5 years and 10 months, GOD has been with you, superconsciously perhaps, letting you know the divine will. 1204§5</p>	<p>GOD is not a person, it is the Universe created by Him, and heaven is everything where He is, and it is also in ourselves because we are part of Him, and He is the creation of our reality, the fourth dimension is only one of the dimensions that we will have to understand and know as we rise through evolution. (Chapter 13, pp 231)</p>
<p>Of all the dangers which beset man’s mortal nature and jeopardize his spiritual integrity, pride is the greatest. Courage is valorous, but egotism is vainglorious and suicidal. Reasonable self - confidence is not to be deplored. Man’s ability to transcend himself is the one thing which distinguishes him from the animal kingdom.</p> <p>“Pride is deceitful, intoxicating, and sin - breeding whether found in an individual, a group, a race, or a nation. It is literally true, ‘Pride goes before a fall.’ 1223§1</p>	<p>Materialism without the self-control of spirituality inclines man to direct his physical and mental efforts to satisfy his material desires. Without control of conscience, pride and vanity encourage evil; the erroneous decisions of his free will, move him away from the truth.</p> <p>Man thinks himself powerful because of his wonderful inventions and for everything he has achieved with his science. In his arrogance, he closes his eyes to the evidence that someone before him did create what he is just trying to understand. (Chapter 7, pp 98)</p>
<p>Christ Michael did not progressively become GOD. GOD did not, at some vital moment in the earth life of Jesus, become man. Jesus was GOD and man—always and even forevermore. And this GOD and this man were, and now are, one, even as the Paradise Trinity of three beings is in reality one Deity.</p> <p>Never lose sight of the fact that the supreme spiritual purpose of the Michael bestowal [Jesus’ life] was to enhance the revelation of GOD.</p> <p>Urantia mortals have varying concepts of the</p>	<p>Perhaps many of your brothers have a hard time accepting that Jesus was not GOD himself but his son just like us, although much more evolved, especially since the opposite has been affirmed and accepted for generations. It is not that our Father does not approach to give them his message of love personally, but that he is doing it in the way that He considers the most appropriate, because our Father approaches each of his children, whether they are small like us or evolved like those that are already carrying out</p>

<p>miraculous, but to us who live as citizens of the local universe there are few miracles, and of these, by far, the most intriguing are the incarnational bestowals of the Paradise Sons. The appearance in and on your world, by apparently natural processes, of a divine Son, we regard as a miracle—the operation of universal laws beyond our understanding. Jesus of Nazareth was a miraculous person.</p> <p>In and through all this extraordinary experience, GOD the Father chose to manifest himself as he always does—in the usual way—in the normal, natural, and dependable way of divine acting.” 1331§3</p>	<p>other activities according to their evolution.</p> <p>All of us are moving forward, each one in his plane but equally brothers of the others for being all children of Him, and for this reason he gives to each, as part of his evolution, the opportunity to serve helping his younger brothers, as well as we are helping you and as you should be helping each other.</p> <p>It has been only for the purpose of helping the poor human understanding, that the Father manifests Himself as three distinct persons even though he is only one, GOD Father is the Creator, GOD the Son is the Teacher and Guide, and GOD the Holy Spirit is the wisdom and knowledge of everything created.</p> <p>(Chapter 11 pp 207)</p> <p>The semi-GODs and the Maitreya are almost equal, the difference is that the Maitreya, although carrying out a mission that generally corresponds to the spirits that help incipient humanities, is actually a very evolved spirit that for some reason has the humility to participate in a work that surely would have already done thousands of years ago In the case of planet Earth, the Maitreya who came to help them was a MICHAEL, the head of our local Universe. (Chapter 18 pp. 367)</p>
--	---

5. Additional Teachings not in the Urantia Book but in the Response

According to the Urantia Book, you are experiencing your first life on your planet of nativity, Urantia (Earth). Here, you formulate choices (consciously or unconsciously) ‘with or away’ from GOD in ways that will determine continuation of your life after physical death (Bradley 2002).

“*Morontia* is a term designating a vast level intervening between the material and the spiritual. It may designate personal or impersonal realities, living or nonliving energies. The warp of morontia is spiritual; its woof is physical.” Urantia Book (1994) 9§2

According to the Urantia book, your soul and personality are the “you” that survives physical death. You are reborn in morontia form on one of the “mansion worlds,” which are some of the architectural (directly created, not evolutionary) headquarters worlds of our local system, Satania (Bradley 2002).

“...the real and conscious reassembly of actual and complete personality takes place in the resurrection halls of mansonia [mansion world] number one. Throughout all eternity you will recall the profound memory impressions of your first witnessing of these resurrection mornings. “From the resurrection halls you proceed to the Melchizedek sector, where you are assigned permanent residence. Then you enter upon ten days of personal liberty. You are free to explore the immediate vicinity of your new home and to familiarize yourself with the program which lies immediately ahead. You also have time to gratify your desire to consult the registry and call upon your loved ones and other earth friends who may have preceded you to these worlds. At the end of your ten-day period of leisure you begin the second step in the Paradise journey, for the mansion worlds are actual training spheres, not merely detention planets.” (Urantia Book 1994) 533§3.

“On mansion world number one (or another in case of advanced status) you will resume your intellectual training and spiritual development at the exact level whereon they were interrupted by death. Between the time of planetary death or translation and resurrection on the mansion world, mortal man gains absolutely nothing aside from experiencing the fact of survival. You begin over there right where you leave off down here.

“Almost the entire experience of mansion world number one pertains to deficiency ministry. Survivors arriving on this first of the detention spheres present so many and such varied defects of creature character and deficiencies of mortal experience that the major activities of the realm are occupied with the correction and cure of these manifold legacies of the life in the flesh on the material evolutionary worlds of time and space.” (Urantia Book 1994) 533§5.

Although the Urantia book does not deny the reincarnation of the soul, it states that humans are having their first existence in Urantia. The Response on the other hand, teaches that reincarnation of the soul is required for evolution purposes. This is consistent with early Christian teachings from the Gnostic movement, Buddhism and American Indian traditions that taught reincarnation (Prophet & Prophet 1997) (McConnell 2013) (Mills 1994). This is supported with the paragraph below from the Response (Hawnsner 2009).

“Look, the whole Universe is like a school for our spirit, from the first steps, from the envelope of the human being that is like his dress, he acquires experience and knowledge. The body is its vehicle of evolution and, when necessary, also of restitution to achieve balance and harmony. This is true justice. Of course, it implies reincarnation and the successive material lives of the

same spirit to achieve it (Chapter 16 pp 277)” (Hawnser 2009).

Hawnser in his book *The Response* (2009), proposes a reincarnation and evolutionary system revealed to him by alien beings. The evolutionary system is summarized below:

- **FIRST EVOLUTIVE PLANE THE HUMANOID:** Its immediate predecessor is the ape, and even being a depository of a soul and with mental spheres, its appearance is similar. It will be the influence of their actions and attitudes that will begin to promote physical change towards man as it is known to act today. The twin souls are identified and attracted to form a couple and reproduce instinctively, when their sexual chakras are activated they produce energy that is sent to the higher planes.
- **SECOND EVOLUTION PLANE THE CAVEMAN:** The main difference with the previous plane is that from the fifth dimension, and taking advantage of the fact that the population of human beings is much larger, the union of soulmates is prevented. This stimulates the instinctive need to find a partner, protect and preserve it, also the instinct to protect children and their food and safety needs, force the development of intelligence that encourages the imagination and thus accelerates its evolution. The needs generated by living conditions on this plane, force him to fight physically with greater intensity. They also excite the development of the other chakras and the need to send evolutionary energy to the higher planes through sexual energy discharges. The lack of the soulmate also fosters violence and this, in turn, incites your mind to get the satisfiers. The average life at this stage is also approximately 25 years, and another cycle of 25,000 years also lasts.
- **THIRD EVOLUTIVE PLANE FIRST LEVEL, MAN:** It continues without the union of soulmates and is characterized by the improvement of the neurobiological systems of mind control and synchronization of the human body. Man has learned by necessity to use the elements that nature provides but adapting them to his needs and convenience. It manufactures utensils and tools, planting, caring for animals for use and providing shelter and shelter. Discover fire, organize a society and manifest your religious inspiration with rituals. Begin to feel the spiritual need through matter. Gradually appear civilizations, technology and science, man feels the need to know the truth of its origin and destiny, begins to intuit and understand the difference between matter and spirit, but lack of knowledge causes an empty space. His physical brain, which is material, will try to fill that void that represents the lack of union between matter and spirit, through rites and ceremonies that become traditions with which, not only tries to express his respect for GODs who fear for not understanding them (rain, fire, wind, etc.), but to satisfy their instinctive religious need.

- **THIRD EVOLUTIVE PLANE FIRST LEVEL, MAN:** He senses his spiritual origin, but he is still very materialized and relies only on his knowledge, nor can he understand the physical and real existence of his spirit, because he wants to find everything in his own material dimension. Its Spiritual necessity can find fictitious supports in the dogmatism of any religion, but for lack of criteria it can fall into fanaticism. Man must not satisfy himself or accept what others have thought, without making his own effort. You must use your will, intelligence, imagination and mind to find your own spiritual identification and thus achieve the necessary evolution that allows you to reach your spiritual elevation to the next level. Man, to overcome himself, must transcend to the higher planes. This will be achieved by having in the mind of your physical brain full awareness of your spiritual presence. The average life of man goes up as science and technology progress, due to the improvement in health and safety conditions that this entails. The duration of the period is also approximately 25 thousand years.
- **THIRD EVOLUTIONARY PLANE SECOND LEVEL, SUPER-MAN:** On this level we continue to be human beings, that is, we have the physical body of living beings and we continue to live on third-dimensional evolutionary planets in space-time. The super-man has a clear concept of his personality, understands that matter tries to impose itself on the physical senses, but he already knows how to hear the voice of his consciousness, the mental spheres, in full function, assist him to understand his position in the Universe. The difference with man is that there is spiritual awareness and one lives in harmony. Intercommunication with our elder brothers of the immediate superior plane is allowed and there is a full awareness of the spiritual presence in the soul of the fourth dimension.
- **THIRD EVOLUTIONARY PLANE SECOND LEVEL, SUPER-MAN:** The life time is much longer, you have an average of 160 to 180 years during incarnations at the super-man level. This stage constitutes the end of life in the third dimension, the spirits will have their last experience of dying, since they will no longer return to third-dimensional bodies, except in special missions. Now they have earned the opportunity to continue their evolution towards higher levels, but already as integrated spirits. The souls in the fifth dimension are integrated into a spirit without sex, which has the full richness of the experiences of the souls of the two sexes from the beginning. They have already eliminated all their karmas and are ready to enter the next evolutionary plane.
- **FOURTH EVOLUTIONARY PLANE SECOND LEVEL, SEMIGODS:** At this stage, knowledge in science and philosophy is very extensive, missions include temporalities of life on evolutionary planets to help younger siblings. They are called that because the humans they help keep the memory of their lives and deify them. Some of them have

come to this planet and remember them for their outstanding teachings and philosophy, such as Muhammad, Quetzalcoatl, Buddha and Viracocha.

- **FOURTH PLAN EVOLUTIVE THIRD LEVEL, MAITREYA:** They are very evolved beings that can handle energies in aid of evolutionary humanities. With prior superior authorization, they can be born on evolutionary planets and be physically equal to their inhabitants, only with full spiritual awareness. They participate in very special missions, during which their actions will be considered as miracles by human beings, who do not yet have the capacity to understand what is happening. In fact, Maitreya means "he who gives love".
- **SIXTH EVOLUTIONARY PLANE BIOLOGICAL ENGINEERS** The Father allows these spirits full of wisdom and experience to handle the pulsating electric charges that give life (-9 to +6). Together with the Cosmic Engineers they prepare planets and fill them with life to prepare them as places for humanities evolution. These tasks take them billions of years of space-time, but since the spirit is immortal, their time does not pass like ours, they live spiritually in another dimension and so they will continue to evolve to the thirteenth dimension.

Based on the description of the evolution levels, human beings on earth are currently on the third evolutionary plane first level. The idea of an evolutionary system that is meant for the human being to evolve into superman is not new. Nietzsche in his book "Thus spoke Zarathustra", proposed that the purpose of existence is the evolution of man into a higher level of consciousness that he called superman (Heidegger & Magnus 1967). In the gospel of Thomas, the vision of Christianity is centered in the evolution of man (Valverde 2020). According to the gospel of Thomas, Jesus said, "Whoever discovers the interpretation of these sayings will not taste death.". The proposed evolutionary model by Hawnsner (2009), suggests that those that achieve the superman level of consciousness have the potential of not tasting death, this is consistent with the reincarnation and evolutionary model proposed in the Gospel of Thomas (Valverde 2020).

In the Fourth evolutionary plane second level, the religious figured mentioned helped in the development of the humanities and try to make men aware of their spiritual origin. For many thousands of years, teaching and spiritual awareness work has been done on the planet earth, although the minds of men of incipient civilizations did not understand and accommodated the revelations according to their capacity and convenience. However, in a technological civilization like ours, we already can understand, but we lack the willingness to do so by being blinded in our materialism.

According to the Hawnsner's proposed model, humans have the potential to evolve into the sixth evolutionary plane and become biological engineers. Biological engineers are beings that create universes, life and planets. This is consistent with other religions such as Mormons that believe

that humans evolve into GODs (Swedin 2013).

5. Conclusions

This article presented the similarities between the teachings given in the book of the Response (a revelation of Alien beings to humans through Hawnser in Mexico) and the Urantia book. Many specific similarities were found in particular in the details of Universe cosmology and other spiritual and philosophical concepts. The article also expanded the Urantia book based on this comparison in particular to concepts that are not very clear in the Urantia book such as reincarnation and evolutionary levels of human existence. Both the Response and Urantia books can be considered modern revelations but the first is through alien encounters while the second one is through revelations of spiritual beings through the channeling phenomena, this last one a parapsychological phenomenon used to communicate with the spiritual world (Valverde 2015). Both revelations have the objective to reconcile science and religion and propose very similar concepts. The article also found consistency between the Response revelation and other religious scriptures of the Gnostic Christians, the book of the Mormon, Buddhism, American Indian traditions and modern philosophers such as Nietzsche. Future work would be focused on finding similarities between these modern revelations and other alien encounter revelations that can give us a better understanding of the origin of human consciousness and evolution.
